

Did you know...

Xcel is planning to put high voltage power lines through the heart of Elbert and El Paso Counties? These lines are intended to provide power to the Denver metro area and possibly even other states – but it is not for us!

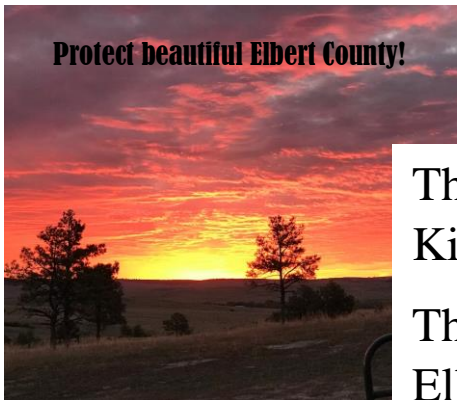

Did you know...

That the next step will be to connect these high voltage lines to wind and solar farms? And that Xcel has widened their “area of interest” for these lines?

Go to www.coloradospowerpathway.com to see the map

Did you know...

There is a local, non-partisan, grassroots group opposing these lines? Elbert County Environmental Alliance has formed, and we need your help!

Plan to attend:

The ECEA meeting, 2/19 at 1:00, at the Kiowa Fire Station.

The Xcel Open House, 3/1 from 3-7, at the Elbert County Fairgrounds.
